PATIENT: Hughes, Mark
DOB: 1/7/1963
MRN: 240810405
PHYSICIAN: Ruth Lim, MD FAAP
DATE: 1/22/2007

EXAM: SKULL - THREE VIEWS

HISTORY: Chest pain.

FINDINGS: No fracture or erosions are seen. On the Towne's view there is three separate lucencies identified, two on the right and one of the left near the occipital bone most likely due to Pacchionian depression. These are considered a normal variant. No other significant findings are seen.

IMPRESSION: NORMAL VARIANT ?

- 1. Unremarkable skull series.
