Dear Dr. Lenorah Wos M.D.

I sincerely appreciate your time and care, and do hold you in high regard for professionalism. And also understand but without being a jerk. I have been dealing with this problem for over a decade. I am taking charge of my health care. Please let's get to the bottom of the problem. I do understand your constraints, Eg. Insurance and costs. Doctor's time is of essence, my health is degrading I will accept no less. Please work with me.

As of the past week my vision has degraded even more.

My lymph nodes in my arm pit area have continued to swell.

I demand to know what "*ADULTERATIONS*" have been done to my body. Court certified and in writing. Do your very best as Physicians as Professionals to restore my health and find the facts. Stake your reputation and Hippocratic Oath on it that is all I ask. I am confident you will.

Court certifiable condition of my *OPTIC NERVE/ PITUITARY GLAND/ HYPOTHALUMUS AND HYPOCALUMUS*. Court certified and in writing. Do your very best as Physicians as Professionals to restore my health and find the facts. Stake your reputation and Hippocratic Oath on it that is all I ask. I am confident you will.

I demand to know what the "*LUCENCIES IN THE OCCIPITAL REGION OF MY CRAINIUM ARE*" Court certified and in writing. Do your very best as Physicians as Professionals to restore my health and find the facts. Stake your reputation and Hippocratic Oath on it that is all I ask. I am confident you will.

On my last examination, while looking in my ears besides the "redness" you made the statement "*there it is*". Doctor Wos what did you see? For the record, and in writing.

Enclosed is a release for MMC for my CT Scans, Barrows is holding a copy of this data and my Radiographs. Please have a competent Radiologist and Neurologist review them.

Please refer me to Barrows, as I feel that they have the resources to handle my health concerns.

Very truly yours,

  
Mark Edward Hughes
